Hi Rene,

Just to let you know, Jordan is feverishly plotting the sediment data at depth. Consequently, he will be ready to go with the plots, and we will not have the down time we had during the last meeting. Jordan also saved the surface plots so we can go back and forth. I believe he is also preparing some plots on the bioassay results and tissue data for carp and small mouth bass.

Matt

Subject: Do we have any agenda for Thursday CSM meeting? or For Friday LWG meeting?

I will probably not be able to do much after this afternoon due to being out sampling the next two days. If there is something that I need to bring, or something I should be doing homework on prior to arriving Thursday I probably need to know it today.

After that the only good chance that I get the information is from a phone message.

If you do have any preliminary ideas I would like to hear them today to make it easier to collect my thoughts and documents.

Thanks, Rene
